## Postes vacants pour certaines professions liées à l'agriculture : Mise à jour au 3<sup>e</sup> trimestre de 2019

### Aperçu

#### Faits saillants

Pourquoi s'intéresser aux postes vacants?

Nombre de postes vacants

Résumé

Tendance

Trois professions liées à l'agriculture

Trois professions liées à la fabrication d'aliments

Situation géographique des postes vacants

Salaires offerts pour les postes vacants

Résumé

Tendance

Ouvriers agricoles

Ouvriers de pépinières et de serres

Manœuvres à la récolte

Opérateurs de machines dans la transformation des

aliments

Manœuvres dans la transformation des aliments

Manœuvres dans la transformation du poisson et des fruits

de mer

Caractéristiques des postes vacants des professions liées à  
l'agriculture et à la transformation des aliments

En résumé

Annexe A : Chevauchement de l'emploi selon le secteur industriel et de l'emploi selon la profession

## Faits saillants

- Au cours du 3<sup>e</sup> trimestre de 2019, on comptait 12 500 postes vacants parmi les trois principales professions liées à l'agriculture. Un tel niveau est égal au pic du 2<sup>e</sup> trimestre de 2015.
- On comptait 8 000 postes vacants parmi les trois principales professions liées à la fabrication d'aliments. Ce niveau est le plus élevé du 3<sup>e</sup> trimestre depuis le début de l'Enquête sur les postes vacants et les salaires (EPVS), en 2015.
- Les postes vacants parmi les professions liées à l'agriculture et à la fabrication d'aliments sont plus susceptibles d'être des emplois saisonniers et d'exiger des niveaux inférieurs de scolarité et peu d'expérience.
- Les entreprises qui ont des postes à pourvoir dans ces professions sont plus susceptibles d'être en recrutement constant pour combler leurs besoins.

---

<sup>1</sup> Voir le document ***Mise à jour de l'information sur le marché du travail du secteur agricole et agroalimentaire : Postes vacants au sein des entreprises agricoles et de fabrication d'aliments : Mise à jour au 3<sup>e</sup> trimestre de 2019*** du CCRHA.

<sup>2</sup> Selon l'Enquête sur les postes vacants et les salaires (EPVS) de Statistique Canada, un poste est vacant s'il est vacant à la date de référence (première journée du mois) ou le deviendra au cours du mois; s'il y a des tâches à accomplir durant le mois pour le poste en question; et si l'employeur cherche activement un travailleur à l'extérieur de l'organisation afin de pourvoir le poste. Les répondants sont choisis au hasard durant les trois mois de chaque trimestre. Les postes peuvent être à temps plein, à temps

## Pourquoi s'intéresser aux postes vacants selon la profession?

Il demeure difficile pour les entreprises agricoles et les entreprises de fabrication d'aliments de recruter des travailleurs. À court terme, elles subiront des pertes de production ou leurs employés souffriront de stress causé par les heures supplémentaires. À long terme, elles ne pourront s'agrandir pour profiter des occasions du marché.

Le présent document accompagne la ***mise à jour de l'information sur le marché du travail***<sup>1</sup> qui fait l'examen des postes vacants<sup>2</sup> déclarés par les entreprises agricoles et de fabrication d'aliments.

Il analyse les pénuries selon les professions liées à l'agriculture et à la fabrication d'aliments. La fabrication d'aliments comprend les activités de transformation des aliments primaire et secondaire<sup>3</sup>. L'analyse selon la profession est un moyen de comprendre les types de compétences exigées pour les emplois qui sont vacants en plus grand nombre.

partiel, permanents, temporaires, occasionnels ou saisonniers.

<sup>3</sup>Le code 311 du Système de classification des industries de l'Amérique du Nord (SCIAN) Fabrication d'aliments englobe les entreprises des sous-secteurs suivants : 3111 Fabrication d'aliments pour animaux (p. ex., aliments pour bétail, aliments pour animaux domestiques); 3112 Mouture de grains céréaliers et de graines oléagineuses; 3113 Fabrication de sucre et de confiseries; 3114 Mise en conserve de fruits et de légumes et fabrication de spécialités alimentaires; 3115 Fabrication de produits laitiers; 3116 Fabrication de produits de viande; 3117 Préparation et conditionnement de poissons et de fruits de mer; 3118 Boulangeries et fabrication de tortillas; 3119 Fabrication d'autres aliments (p. ex., aliments à grignoter, torréfaction et mouture de café, sauces et condiments, etc.).

# Nombre de postes vacants

**Résumé**<sup>1</sup> Les résultats de l'EPVS pour le 3<sup>e</sup> trimestre de 2019 ont été publiés le 17 décembre 2019.<sup>4</sup>

Les personnes employées dans chaque secteur industriel occupent des emplois aussi nombreux que diversifiés. Figurent à l'annexe A des renseignements sur les divers emplois en agriculture et dans les entreprises de fabrication d'aliments.

En raison des considérations exposées à l'annexe A, on présente ici le nombre de postes vacants pour les emplois occupés par un grand nombre de travailleurs dans les entreprises agricoles et les entreprises de fabrication d'aliments.

Pour le 3<sup>e</sup> trimestre de 2019, l'EPVS de Statistique Canada fait état de 12 500 postes vacants pour trois professions importantes liées à l'agriculture<sup>5</sup> (tableau<sup>6</sup> 1). Ce niveau est

Data in yellow cell is a guesstimate.

1. For jobs and individuals, NOCS is the National Occupational Classification System

2. Job vacancy data apply to paid or hired workers and do not apply to self-employed workers. A job is vacant if it is vacant on the reference date (first day of the month) or will become vacant during the month, there are tasks to be carried out during the month for the job in question, and the employer is actively seeking a worker outside the organization to fill the job. Respondents are surveyed randomly during the 3 months of each quarter. The jobs could be full-time, part-time, permanent, temporary, casual, or seasonal.

3. Vacancies for three major farm-related occupations, regardless of the industry sector of the employer.

4. Within NOCS 946, about 1/3 of the vacancies were for NOCS 9461 (e.g., "process control and machine operators"), about 1/3 were for NOCS 9462 (e.g., "industrial butchers and meat cutters") and about 1/3 were for NOCS 9463 (e.g., "fish and seafood plant workers").

5. Vacancies for selected major food processing occupations, regardless of the industry sector of the employer.

6. In the 3<sup>rd</sup> quarter of 2019, all data for Harvesting labourers (NOCS 8611) were assigned an "x" to indicate that the data were suppressed to meet the requirements of the Statistics Act. In this table, the data for the 3<sup>rd</sup> quarter of 2019 has been calculated as the average of the 3<sup>rd</sup> quarter data for 2015, 2016, 2017 and 2018.

Source: Statistics Canada, Job Vacancy and Wage Survey, Table 14-10-0356-02 (formerly CANSIM Table 285-0003).

Prière de se reporter aux tableaux 14-10-0325-01, 14-10-0326-01, 14-10-0328-01, 14-10-0356-01 et 14-10-0356-02 (auparavant CANSIM285-0001, 285-0002, 285-0003 et 285-0004) à <https://www150.statcan.gc.ca/n1/fr/type/donnees>.

<sup>5</sup> Les tableaux présentant la profession touchée par un poste vacant montrent aussi le code de la Classification nationale des professions (CNP) s'y rattachant. La CNP est le système de classification nationale des professions. Pour en savoir davantage à ce sujet, prière de consulter Statistique Canada. (2012) **Classification nationale des professions (CNP) 2011** (produit n° 12-583-X au catalogue de

Statistique Canada, Ottawa)

(<https://www.statcan.gc.ca/fra/sujets/norme/cnp/2011/index>).

<sup>6</sup> Fait important, le niveau de postes vacants déclaré ici pour les trois principales professions est semblable à celui associé à toutes les professions déclarées pour le secteur agricole et les entreprises de fabrication d'aliments. Voir le tableau 1 du document d'accompagnement **Mise à jour de l'information sur le marché du travail du secteur agricole et agroalimentaire : Postes vacants au sein des entreprises agricoles et de fabrication d'aliments : Mise à jour au 3<sup>e</sup> trimestre de 2019** du CCRHA.

égal au pic de postes vacants déclaré au 2<sup>e</sup> trimestre de 2015.

En outre, au cours du 3<sup>e</sup> trimestre de 2019, on dénombrait 8 000 postes vacants pour les trois principales professions liées à la fabrication d'aliments. Ce niveau de postes vacants est le premier en importance au 3<sup>e</sup> trimestre depuis l'instauration de l'EPVS en 2015.

Le tableau 2 présente les postes vacants pour un grand nombre de professions liées au secteur agricole et agroalimentaire.

1. A job is vacant if it is vacant on the reference date (first day of the month) or will become vacant during the month, there are reasons to be carried out during the month for the job in question, and the employer is actively seeking a worker outside the organization to fill the job. Respondents are surveyed randomly during the 3 months of each quarter. The jobs could be full-time, part-time, permanent, temporary, casual, or seasonal.

# Nombre de postes vacants

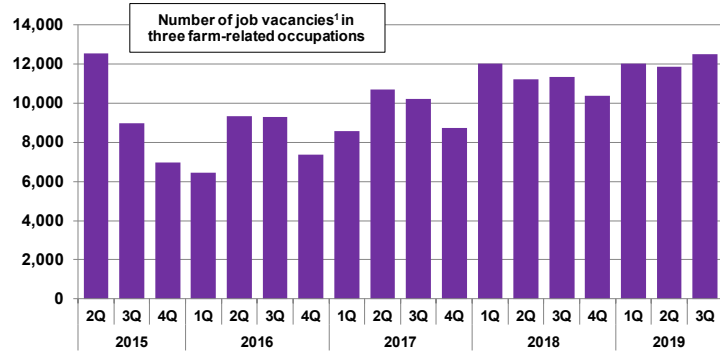

## Tendances – Trois professions liées à l’agriculture

Comme il a été mentionné précédemment, le nombre de postes vacants pour trois professions liées à l’agriculture a été de 12 500 au 3<sup>e</sup> trimestre de 2019 (figure 1). Le nombre de postes vacants a dépassé les 10 000 au cours des sept derniers trimestres.

Une comparaison entre le nombre de postes vacants et leur niveau au cours d’un même trimestre (c.-à-d. d’une même « saison ») de l’année précédente révèle une hausse du nombre de postes vacants (c.-à-d. que les barres sont supérieures à zéro dans la figure 2) depuis le 3<sup>e</sup> trimestre de 2016.

Par ailleurs, le calcul de la moyenne des quatre trimestres précédents (c.-à-d. une moyenne annuelle calculée chaque trimestre) montre encore une fois que le nombre de postes vacants est à la hausse depuis le 3<sup>e</sup> trimestre de 2016 (figure 3).

**Figure 1**  
The number of job vacancies<sup>1</sup> in three farm-related occupations (General Farm Workers, Nursery & Greenhouse Workers & Harvesting Labourers) was 12.5 thousand in the 3<sup>rd</sup> quarter of 2019, Canada

# Nombre de postes vacants

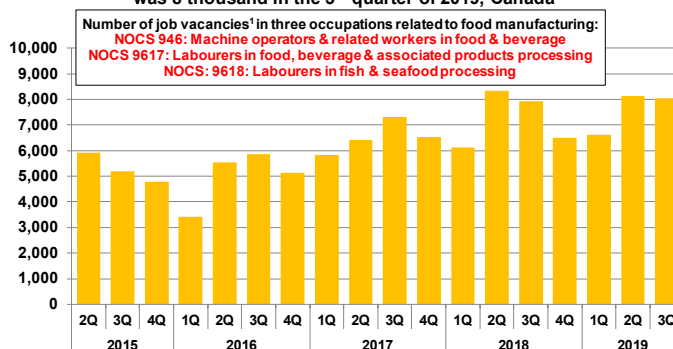

## Tendances – Trois professions liées à la fabrication d'aliments

Comme il a été mentionné précédemment, le nombre de postes vacants pour trois professions liées à la fabrication d'aliments a atteint 8 000 au 3<sup>e</sup> trimestre de 2019 (figure 4). Le nombre de postes vacants a été supérieur à 6 000 au cours des 10 derniers trimestres (c.-à-d. depuis le 2<sup>e</sup> trimestre de 2017).

Une comparaison entre la variation des postes vacants d'un trimestre donné et celle survenue au cours du même trimestre (c.-à-d. en comparant les postes vacants au cours de la même saison) de l'année précédente a révélé une hausse du nombre de postes vacants pour trois professions liées à la fabrication d'aliments du 3<sup>e</sup> trimestre de 2016 au 3<sup>e</sup> trimestre de 2018 (c.-à-d. que les barres montrent une variation positive) (figure 5). Au cours des quatre derniers trimestres, de légères variations (positives et négatives) ont été enregistrées.

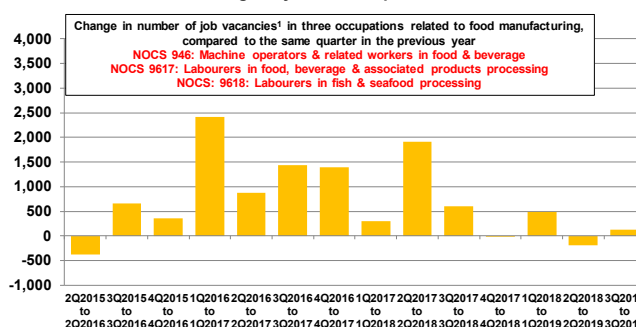

Le calcul d'une moyenne mobile sur quatre trimestres (c.-à-d. une moyenne sur quatre saisons) montre une fois de plus que le nombre de postes vacants pour trois professions liées à la fabrication d'aliments a augmenté, de façon générale, depuis le 3<sup>e</sup> trimestre de 2016 (figure 6).

Figure 4  
The number of job vacancies<sup>1</sup> in three occupations related to food manufacturing was 8 thousand in the 3<sup>rd</sup> quarter of 2019, Canada

## Situation géographique des postes vacants

Afin d'illustrer la situation géographique des postes vacants, la présente mise à jour donne deux exemples de la répartition géographique des postes vacants liés à des professions agricoles du niveau à trois chiffres de la Classification nationale des professions (CNP).

L'un de ces exemples est celui des « manœuvres à la récolte, en aménagement paysager et en ressources naturelles » (code 861 de la CNP<sup>7</sup>), profession où l'on dénombrait 8 800 postes vacants au 3<sup>e</sup> trimestre de 2019 (tableau 3). Dans ce groupe, 2 700 des postes vacants se trouvaient en Ontario (30 % du total canadien) et 1 200 en Colombie-Britannique. En ce qui a trait aux régions économiques, plus de 500 postes vacants ont été déclarés dans les régions de Hamilton-Niagara, en Ontario, et de Thompson-Okanagan, en Colombie-Britannique. Dans le tableau 3, les provinces et leurs régions économiques sont classées selon le nombre de postes vacants pour la profession donnée (plus précisément, elles sont classées selon le plus grand nombre de postes vacants déclarés tous trimestres confondus). L'échantillon pour les provinces et les régions économiques absentes du tableau était trop petit pour produire une estimation fiable.

Un autre exemple est celui du « Personnel en agriculture et en horticulture » (code 843 de la CNP<sup>8</sup>) pour lequel 9 100 emplois étaient

vacants au cours du 3<sup>e</sup> trimestre de 2019 (tableau 4). L'Ontario comptait 3 900 postes vacants (43 % du total) et la Colombie-Britannique en comptait 2 700 pour cette profession (30 % du total canadien). La région économique Hamilton-Péninsule du Niagara, en Ontario, a déclaré 1 400 postes vacants au cours du 3<sup>e</sup> trimestre de 2019.

---

<sup>7</sup> Nota : Une petite partie des postes vacants du code 861 de la CNP concerne les manœuvres à la récolte (code 8611) (tableau 2).

<sup>8</sup> Nota : La majeure partie des postes vacants du code 843 de la CNP concernent les ouvriers agricoles (code 8431) (tableau 2).

**Tableau 3**

**Ranking of economic regions by number of job vacancies in one of the quarters for Occupation 861 = Harvesting, landscaping and natural resources labourers, up to the 3<sup>rd</sup> quarter of 2019**

# Salaires offerts<sup>9</sup> pour les postes vacants

## Résumé

Au 3<sup>e</sup> trimestre de 2019, le salaire offert pour les postes vacants de trois professions importantes liées à l'agriculture allait de moins de 14 \$ l'heure chez les manœuvres à la récolte à 15,05 \$ l'heure chez les ouvriers agricoles (tableau 5).

Ces salaires sont comparables à ceux offerts aux manœuvres dans la transformation des aliments (15,15 \$ l'heure) et aux manœuvres dans la transformation du poisson et des fruits de mer (13,30 \$ l'heure).

Le salaire offert aux opérateurs de

1. Respondents (i.e. enterprises) are requested to provide the minimum offered wage for each occupation with a vacancy. The wage tabulated here is the average of the reported offered wage across all occupations with a vacancy and across all enterprises with a job vacancy.

2. Job vacancy data apply to paid or hired workers and do not apply to self-employed workers. A job is vacant if it is vacant on the reference date (first day of the month) or will become vacant during the month, there are tasks to be carried out during the month for the job in question, and the employer is actively seeking a worker outside the organization to fill the job. Respondents are surveyed randomly during the 3 months of each quarter. The jobs could be full-time, part-time, permanent, temporary, casual, or seasonal.

3. For jobs and individuals, NOCS is the National Occupational Classification System.

4. Vacancies for three major farm-related occupations, regardless of the industry sector of the employer.

5. Vacancies for selected major food processing occupations, regardless of the industry sector of the employer.

6. Within NOCS 946, about 1/3 of the vacancies were for NOCS 9461 (e.g., "process control and machine operators"), about 1/3 were for NOCS 9462 (e.g., "industrial butchers and meat cutters") and about 1/3 were for NOCS 9463 (e.g., "fish and seafood plant workers").

machines dans le secteur de la transformation des aliments était légèrement supérieur (15,95 \$ l'heure).

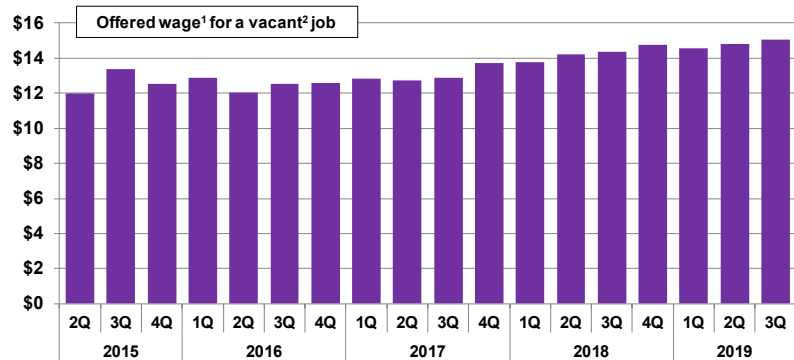

<sup>9</sup> Chaque entreprise visée par l'EPVS doit indiquer le salaire offert le plus bas pour chaque poste vacant. Le salaire indiqué dans le tableau représente la moyenne du salaire déclaré offert parmi tous les postes vacants et toutes les entreprises où un emploi est vacant.

# Salaires offerts pour les postes vacants

## Ouvriers agricoles

Au 3<sup>e</sup> trimestre de 2019, le salaire offert pour les postes vacants de la profession d'ouvrier agricole (code 8431 de la CNP) s'élevait à 15,05 \$ l'heure, soit un salaire plus élevé que ceux versés durant les trimestres précédents (figure 7).

Figure 7 **For NOCS 8431 General Farm Workers, the offered wage<sup>1</sup> for a vacant<sup>2</sup> job was \$15.05 in the 3<sup>rd</sup> quarter of 2019, Canada**

1. Respondents (i.e. enterprises) are requested to provide the minimum offered wage for each occupation with a vacancy. The wage tabulated here is the average of the reported offered wage across all occupations with a vacancy and across all enterprises with a job vacancy.  
 2. A job is vacant if it is vacant on the reference date (first day of the month) or will become vacant during the month, there are tasks to be carried out during the month for the job in question, and the employer is actively seeking a worker outside the organization to fill the job. Respondents are surveyed randomly during the 3 months of each quarter. The jobs could be full-time, part-time, permanent, temporary, casual, or seasonal.

# Salaires offerts pour les postes vacants

## Manœuvres dans la transformation du poisson et des fruits de mer

Le salaire offert pour les postes vacants de manœuvre dans la transformation du poisson et des fruits de mer (code 9618 de la CNP) au 3<sup>e</sup> trimestre de 2019 était de 13,30 \$ l'heure, soit un niveau semblable à celui signalé depuis le 4<sup>e</sup> trimestre de 2017 (figure 17).

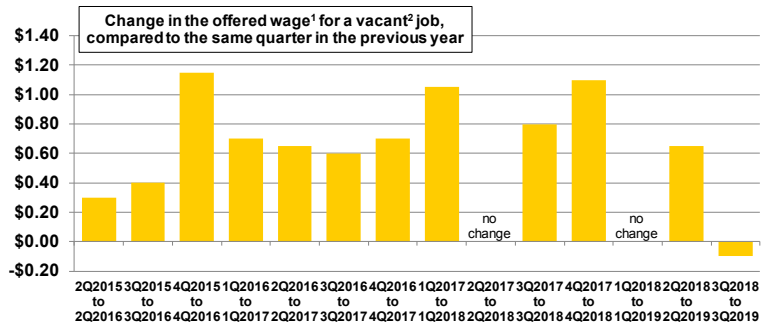

Figure 17 For NOCS 9618 **Labourers in Fish & Seafood Processing**, the offered for a vacant<sup>2</sup> job was \$13.30 in the 3<sup>rd</sup> quarter of 2019, Canada

1. Respondents (i.e. enterprises) are requested to provide the minimum offered wage for each occupation with a vacancy. The wage tabulated here is the average of the reported offered wage across all occupations with a vacancy and across all enterprises with a job vacancy.  
 2. A job is vacant if it is vacant on the reference date (first day of the month) or will become vacant during the month, there are tasks to be carried out during the month for the job in question, and the employer is actively seeking a worker outside the organization to fill the job. Respondents are surveyed randomly during the 3 months of each quarter. The jobs could be full-time, part-time, permanent, temporary, casual, or seasonal.  
 Source: Statistics Canada. Job Vacancy and Wage Survey, Table 14-10-0356-02 (former CANSIM Table 285-0003). Chart by Ray D. Bolman@asktel.net

Le salaire offert pour cette profession a généralement augmenté depuis l'instauration de l'EPVS, à trois exceptions près : aucun changement n'a été signalé au 2<sup>e</sup> trimestre de 2018, et au 1<sup>er</sup> trimestre de 2019, et une légère baisse a été signalée au 3<sup>e</sup> trimestre de 2019 (figure 18).

Figure 18 For NOCS 9617 **Labourers in Fish & Seafood Processing**, the offered wage<sup>1</sup> for a vacant<sup>2</sup> job increased from the 2Q2016 to the 2Q2019, Canada

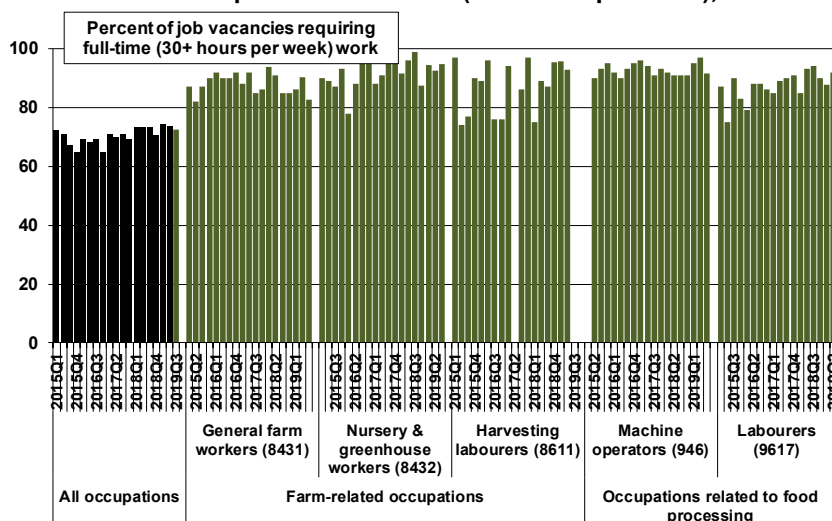

1. Respondents (i.e. enterprises) are requested to provide the minimum offered wage for each occupation with a vacancy. The wage tabulated here is the average of the reported offered wage across all occupations with a vacancy and across all enterprises with a job vacancy.  
 2. A job is vacant if it is vacant on the reference date (first day of the month) or will become vacant during the month, there are tasks to be carried out during the month for the job in question, and the employer is actively seeking a worker outside the organization to fill the job. Respondents are surveyed randomly during the 3 months of each quarter. The jobs could be full-time, part-time, permanent, temporary, casual, or seasonal.

# Caractéristiques des postes vacants des professions liées à l'agriculture et à la transformation des aliments

Parmi les professions liées à l'agriculture et à la transformation des aliments, plus des deux tiers des postes vacants nécessitaient des travailleurs à temps plein (30 heures ou plus de travail par semaine) (figure 19 et tableau 6), ce qui est plus élevé que pour toutes les professions au Canada, pour lesquelles un nombre relativement plus élevé de postes à doter étaient liés à des emplois à temps partiel (moins de 30 heures par semaine).

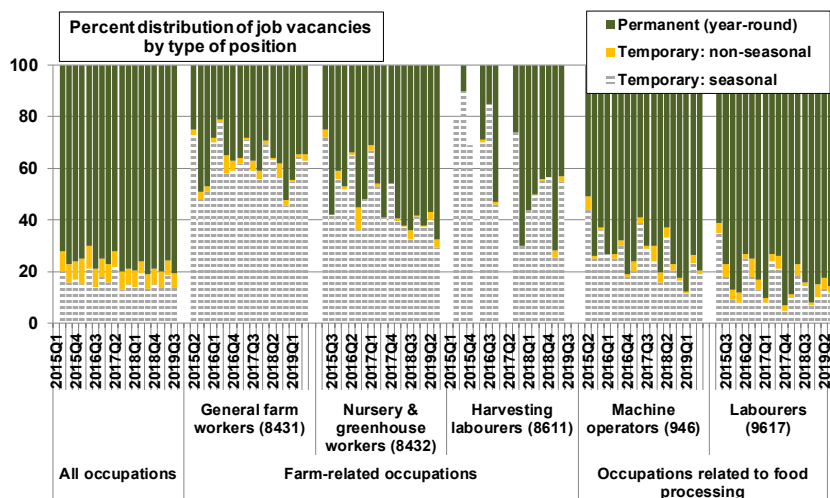

Figure 19 Over 2/3 of farm and food-related job vacancies require full-time work (30+ hours per week), Canada

Source: Statistics Canada. Job Vacancy and Wage Survey, Table 14-10-0328-01 (formerly CANSIM Table 285-0004).

Toutefois, les postes vacants dans les professions liées à l'agriculture sont beaucoup plus susceptibles d'être saisonniers. Depuis 2015, plus de la moitié des postes vacants pour les ouvriers agricoles sont des emplois saisonniers (figure 20 et tableau 7).

Figure 20 Job vacancies for farm-related occupations are much more likely to be seasonal jobs, Canada

Source: Statistics Canada. Job Vacancy and Wage Survey, Table 14-10-0328-01 (formerly CANSIM Table 285-0004).

Parmi les emplois d'ouvriers de pépinières et de serres, de 40 à 60 % (selon le trimestre) des postes vacants étaient liés à des emplois saisonniers.

La plupart des postes vacants associés aux emplois d'ouvriers à la récolte concernent des emplois saisonniers (sauf durant les mois d'hiver [par

exemple, durant les 4<sup>e</sup> trimestre de 2016 et 2017, les 1<sup>er</sup> et 2<sup>e</sup> trimestres de 2018 et le 1<sup>er</sup> trimestre de 2019] où la plupart des postes vacants qui concernent les quelques emplois à la récolte sont pour des emplois permanents).

Source: Statistics Canada. Job Vacancy and Wage Survey, Table 14-10-0328-01 (formerly CANSIM Table 285-0004).

La plupart des postes vacants (60 % ou plus) pour les professions liées à l'agriculture n'exigeaient aucun niveau minimum de scolarité (figure 21 et tableau 8).

En ce qui concerne les emplois dans la fabrication d'aliments, de 40 à 60 % des postes vacants (selon le trimestre) n'exigeaient des candidats aucun niveau minimum de scolarité pour être pourvus.

De même, plus de 90 % des postes vacants pour des professions liées à l'agriculture ne nécessitaient pas de certificat ou de diplôme (figure 22 et tableau 9).

...: not available; "F": too unreliable to publish due to small sample size; "x": data suppressed to meet the requirements of the Statistics Act.  
 Source: Statistics Canada. Job Vacancy and Wage Survey, Table 14-10-0328-01 (formerly CANSIM Table 285-0004).

En outre, la plupart des postes vacants pour des professions liées à l'agriculture et à la fabrication d'aliments exigeaient peu d'expérience ou aucune expérience (moins d'une année) (figure 23 et tableau 10).

Figure 23

**Over 2/3 of farm and food-related job vacancies require <1 year of experience, Canada**

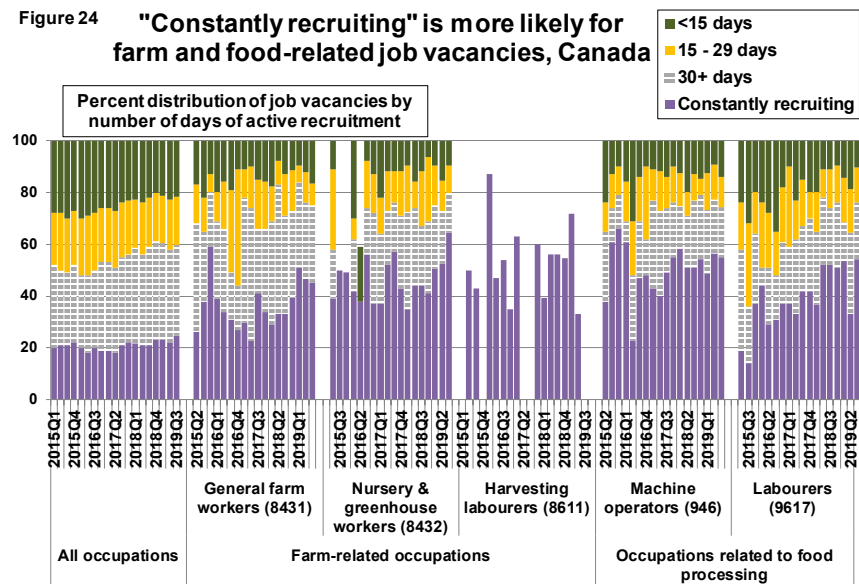

Source: Statistics Canada. Job Vacancy and Wage Survey, Table 14-10-0328-01 (formerly CANSIM Table 285-0004).

Pour maintenir leurs effectifs, les employeurs offrant des emplois liés à l'agriculture étaient plus susceptibles d'être en recrutement constant, comparativement à ceux d'autres entreprises ayant des postes à pourvoir pour d'autres professions (figure 24 et tableau 11).

Figure 24

**"Constantly recruiting" is more likely for farm and food-related job vacancies, Canada**

Source: Statistics Canada. Job Vacancy and Wage Survey, Table 14-10-0328-01 (formerly CANSIM Table 285-0004).

Il est à noter que bien que le « recrutement constant » soit entrepris pour environ 20 % des postes vacants liés à toutes les professions de l'économie, il est effectif pour 20 à 60 % des postes vacants liés

à des professions agricoles et à la fabrication d'aliments.

 Source: Statistics Canada. Job Vacancy and Wage Survey, Table 14-10-0328-01 (formerly CANSIM Table 285-0004).

Pour ce qui est des postes vacants parmi toutes les professions au Canada, la stratégie de recrutement la plus populaire utilisée par les employeurs est l'affichage sur un guichet d'emploi en ligne, stratégie employée par environ trois quarts des entreprises ayant des postes à pourvoir (tableau 12). Elle est tout aussi susceptible d'être utilisée (selon la saison) parmi les entreprises qui recrutent pour pourvoir à des postes liés à l'agriculture et à la transformation des aliments.

Le tableau 12 présente la tendance historique en ce qui concerne les trois principales professions liées à l'agriculture et les trois principales professions liées à la fabrication d'aliments. Le tableau 13 présente les données du 2<sup>e</sup> trimestre de 2019 pour une vaste gamme de professions liées au secteur agroalimentaire.

Une proportion de 60 à 66 % des employeurs ont recours aux relations personnelles, aux recommandations et aux réseaux informels comme stratégie de recrutement, stratégie qui vient au deuxième rang de celles les plus populaires dans toute l'économie, selon le trimestre. Les employeurs en agriculture et en fabrication d'aliments l'utilisent généralement dans la même proportion (ils sont même plus susceptibles de l'utiliser pour certaines professions que les employeurs de l'ensemble de l'économie).

La stratégie qui vient au troisième rang de celles les plus utilisées dans toute l'économie est le site Web de l'entreprise, stratégie employée par une proportion allant de 52 à 61 % des entreprises ayant des postes à pourvoir. Elle est cependant moins susceptible

d'être utilisée par les employeurs agricoles, mais (presque) aussi prisée par les entreprises de transformation des aliments.

Relativement à l'entreprise moyenne ayant des postes à doter, les employeurs en agriculture et en fabrication d'aliments (tel que l'illustre le tableau 12) sont :

- à peu près également susceptibles de recruter en ayant recours aux médias sociaux (selon la saison);
- plus susceptibles de recruter en utilisant les centres d'emploi ou les sites Web du gouvernement;
- plus enclins à recruter au moyen d'annonces dans les journaux.

## En résumé

Le nombre de postes vacants déclarés pour les trois principales professions liées à l'agriculture a été de l'ordre de 12 500 postes au 3<sup>e</sup> trimestre de 2019. Le nombre de postes vacants pour les trois professions liées aux exploitations agricoles a été constamment supérieur à 10 000 postes vacants depuis le 1<sup>er</sup> trimestre de 2018.

Plus précisément, le niveau de postes vacants des « ouvriers agricoles » (6 700) est plus élevé que celui de tout 3<sup>e</sup> trimestre depuis le début de l'EPVS.

On a recensé 8 000 postes vacants pour les trois principales professions liées à la transformation des aliments au cours du 3<sup>e</sup> trimestre de 2019. Le nombre de postes vacants a été supérieur à 6 000 au cours des 10 derniers trimestres (c.-à-d. depuis le 2<sup>e</sup> trimestre de 2017).

Les postes vacants parmi les professions liées à l'agriculture et à la fabrication d'aliments sont plus susceptibles d'être des emplois saisonniers et d'exiger des niveaux inférieurs de scolarité et peu d'expérience.

Les entreprises qui ont des postes à pourvoir dans ces professions sont plus susceptibles d'être en recrutement constant pour combler leurs besoins.

## Annexe A : Chevauchement de l'emploi selon le secteur industriel et de l'emploi selon la profession

Dans les fermes canadiennes<sup>10</sup> en 2011, 322 110 personnes étaient employées dans 62 professions diverses, si on ne compte que les professions exercées par 200 travailleurs et plus partout au Canada (annexe tableau A1). La profession où l'on a dénombré le plus grand nombre de travailleurs a été celle des « gestionnaires en agriculture », profession composée surtout d'agriculteurs indépendants, quoique certaines fermes aient des gestionnaires rémunérés parmi les membres de leur personnel. Les quatre professions suivantes comptant le plus grand nombre de personnes travaillant dans les exploitations agricoles se déclinent comme suit :

- CNP 8431 – Ouvriers agricoles (73 905);
- CNP 8432 – Ouvriers de pépinières et de serres (11 870);
- CNP 8252 – Entrepreneurs de services agricoles, surveillants d'exploitations agricoles et ouvriers spécialisés dans l'élevage<sup>11</sup> (5 610);
- CNP 8611 – Manœuvres à la récolte<sup>12</sup> (5 295) (annexe tableau A1).

Certains travailleurs de ces professions sont employés par des entreprises qui ne sont pas classées comme étant des « exploitations

agricoles ». Pour les quatre professions susmentionnées, les proportions de travailleurs au sein d'exploitations agricoles sont les suivantes :

- 89 % – Ouvriers agricoles<sup>13</sup>;
- 79 % – Ouvriers de pépinières et de serres<sup>14</sup>;
- 57 % – Entrepreneurs de services agricoles, surveillants d'exploitations agricoles et ouvriers spécialisés dans l'élevage<sup>15</sup>;
- 94 % – Manœuvres à la récolte<sup>16</sup>.

La situation des entreprises de fabrication d'aliments ressemble à celle des entreprises agricoles en ce qui concerne la vaste gamme de professions que l'on y trouve. En 2011, on dénombrait 216 145 emplois en fabrication d'aliments et 71 professions différentes comptant plus de 300 employés dans tout le Canada (annexe tableau A2).

Les quatre principales professions étaient les suivantes :

- CNP 9617 – Manœuvres dans la transformation des aliments, des boissons et des produits connexes (44 970);
- CNP 9461 – Opérateurs de machines et de procédés industriels dans la transformation des aliments, des boissons et des produits connexes (21 850);
- CNP 6332 – Boulangers-pâtisseries (12 410);
- CNP 9462 – Bouchers industriels, dépeceurs-découpeurs de viande,

d'élevage de troupeaux laitiers, de bovins, d'ovins, de volaille, de chevaux, de porcins et autres.

<sup>12</sup>Rappelons que l'Enquête nationale auprès des ménages de 2011 de Statistique Canada dénombrait le niveau d'emploi pour la semaine de référence du dimanche 1<sup>er</sup> mai au samedi 7 mai 2011. Par conséquent, les manœuvres à la récolte saisonniers n'ont pas fait l'objet du dénombrement.

<sup>13</sup> Un autre 2 % de travailleurs sont liés au code 115 du SCIAN – Activités de soutien à l'agriculture et à la foresterie, à l'emploi en particulier d'entrepreneurs de services d'aide à la récolte.

<sup>14</sup> Un autre 9 % sont liés aux codes 44-45 du SCIAN – Commerce de détail, en particulier de centres-jardins.

<sup>15</sup> Un autre 21 % de travailleurs sont liés au code 711 du SCIAN – Arts d'interprétation, sports-spectacles et activités connexes, en particulier d'entreprises de courses de chevaux.

<sup>16</sup> Un autre 5 % de travailleurs sont liés au code 115 du SCIAN – Activités de soutien à l'agriculture et à la foresterie, en particulier pour des entrepreneurs de services d'aide à la récolte.

<sup>10</sup> Les exploitations agricoles comprennent les entreprises de cultures agricoles (code 111 du Système de classification des industries de l'Amérique du Nord [SCIAN]) et les entreprises d'élevage et d'aquaculture (code 112 du SCIAN). Prière de consulter Statistique Canada. (2007) **Système de classification des industries de l'Amérique du Nord : 2007** (produit n° 12-501 au catalogue de Statistique Canada, Ottawa) (<https://www150.statcan.gc.ca/n1/fr/catalogue/12-501-X>).

<sup>11</sup> Cela inclut les entrepreneurs de services agricoles qui sont propriétaires-exploitants de leur propre établissement et fournissent des services agricoles tels que l'élevage du bétail et de la volaille, la préparation des sols, l'ensemencement, la pulvérisation des récoltes, les méthodes de culture et les récoltes et d'autres services d'entrepreneur. Ce groupe comprend aussi les surveillants d'exploitations agricoles qui surveillent le travail des ouvriers agricoles et des manœuvres à la récolte, ainsi que les ouvriers spécialisés dans l'élevage du bétail qui exécutent des programmes d'alimentation, de soins de santé et de reproduction dans les fermes

préparateurs de volaille et personnel assimilé (11 115) (annexe tableau A2).

Encore une fois ici, on constate qu'un bon nombre de personnes exerçant ces professions sont employées dans d'autres secteurs. Par exemple, pour les quatre professions susmentionnées, les pourcentages de travailleurs dans les entreprises de fabrication se déclinent comme suit :

- 74 % – Manœuvres dans la transformation des aliments, des boissons et des produits connexes<sup>17</sup>;
- 71 % – Opérateurs de machines et de procédés industriels dans la transformation des aliments, des boissons et des produits connexes<sup>18</sup>;
- 30 % – Boulangers-pâtisseries<sup>19</sup>;
- 90 % – Bouchers industriels, dépeceurs-découpeurs de viande, préparateurs de volaille et personnel assimilé (annexe tableau A2).

Pour l'EPVS toutefois, Statistique Canada ne publie que les postes vacants pour les emplois d'un groupe de professions donné, non pour un groupe de professions à l'intérieur d'un secteur industriel précis<sup>20</sup>.

Par conséquent, compte tenu des données publiées, on ne peut présenter ici que le niveau de postes vacants pour tous les emplois d'une profession donnée, sans savoir si les postes vacants relatifs à cette profession sont liés précisément aux exploitations agricoles ou aux entreprises de fabrication d'aliments.

De plus, les tableaux publiés n'indiquent pas le nombre d'employés salariés pour chaque profession ni, par conséquent, un taux de postes vacants<sup>21</sup>.

---

<sup>17</sup> Un autre 8 % de travailleurs sont liés au code 41 du SCIAN – Commerce de gros.

<sup>18</sup> Un autre 13 % de travailleurs sont liés au code 312 du SCIAN – Fabrication de boissons et de produits du tabac.

<sup>19</sup> Un autre 39 % de travailleurs sont liés aux codes 44-45 du SCIAN – Commerce de détail (p. ex., épicerie) et un autre 26 % de travailleurs, au

code 72 – Services d'hébergement et de restauration (p. ex., restaurants).

<sup>20</sup> Une totalisation spéciale produirait des résultats précis si la taille de l'échantillon était suffisante.

<sup>21</sup> Encore une fois ici, on pourrait envisager de produire une totalisation spéciale pour calculer les taux de postes vacants pour les professions dont la taille de l'échantillon serait suffisante.
